

Job Title: SQL Data & Report Analyst
Reporting to: Software Development Director
Location: Hare Hatch, near Reading, Berkshire
RG10 9AA

Our business:

CML Software Limited is a leading software solutions provider to the property industry. We specialise in the development and supply of sales, lettings, property management and accounting software for the property industry. CML is constantly innovating and is now seeking to recruit an additional Microsoft SQL server Data and Report Analyst.

Background of the position

The successful applicant will join an established development team. The role will involve liaising with internal support, implementation and account management departments. The role will be based at CML's office in Hare Hatch (near Twyford) and the working hours will be 9.00am to 5.30pm Monday to Friday.

Main Responsibilities

- The creation of new reports using native T-SQL, Stored Procedures and proprietary tools
- Working with front end developers to produce data for our software products and report layout designers to produce layouts to meet customer specifications
- Optimising the performance of production databases
- Occasionally helping install and configure SQL Server for new clients and other DBA related tasks
- Experience in Financial reporting would be an advantage but is not essential

Offer

- Market competitive salary commensurate with skills and experience
- Contributory pension scheme after qualifying period
- The opportunity to join a successful and growing company with significant personal development potential
- A stable work environment
- Free on Site Parking
- CML Software Ltd is an Investor In People accredited employer
