

Job Title: Delphi Software Developer
Reporting to: Software Development Director
Location: Hare Hatch, near Reading, Berkshire RG10 9AA

Our business:

CML Software Ltd is a Reading/Maidenhead located software house which develops supplies and supports property management and accounting software products for the property industry. The business, which is now a market leader within its niche, is constantly innovating and is now seeking to recruit an additional Delphi / RAD Studio software developer to expand the technical team.

Background of the position:

The successful applicant will join a team of software programmers. The Company's current "back office" applications utilise Delphi and MS SQL Server and the strategy is to maintain and enhance the existing suite of products with this technological platform. The new programmer appointee will further develop, improve and document the existing applications and be involved in the design and development of new software solutions.

Job description:

- Delphi software development and maintenance of existing Delphi applications
- Bug fixing (limited requirement, as very stable applications) and third line support incidents
- Analyse client development requests, plan and prioritise development work with the Development Director

Profile:

- Experienced as a Delphi developer (PHP or VB6 developers with good knowledge of Delphi will also be considered)
- Good spoken English with good analytical skills

Offer:

- Market competitive salary commensurate with skills and experience
- Contributory pension scheme after qualifying period
- The opportunity to join a successful and growing company with significant personal development potential
- A stable work environment
- Semi-rural location with excellent road access and parking
- CML Software Ltd is an Investor In People accredited employer
